WORKSHEET 1

GRADE: V

SUBJECT: Science

Matter and its properties & Physical changes

1. Anything that has.....and occupies.....is called matter.
 2. Matter is made up of small.....
 3. The process of changing of solid into a liquid using heat is called.....
 4.is an example of reversible change.
 5. Particles in.....far apart and have no regular shape.
 - 6.....is an example of physical change.
 7. Why do things expand when heated and contract when cooled?
 8. What is condensation? How is it useful?
 9. How solids and liquids are different in case of arrangement of particle?
 10. What are the two properties of matter? Explain.
 11. What is the difference between vaporization and evaporation?
 12. How many types are matters?
 13. Why are the three states of matter different from each other?
 14. Why are solids are incompressible?
 15. Melting of wax is a change where a solid changes to liquid state. Give one more example which you observe in your surroundings.
