1. Read the following passage and answer the questions given below.

What are clouds?

A cloud is made of water drops or ice-crystals floating in the sky. There are many kinds of clouds. Clouds get their names in two ways. One way is by where they are found in the sky. Some clouds are high up in the sky. Low clouds form closer to Earth's surface. These clouds are called fog. Middle clouds are found between low and high clouds. Another way clouds are named is by their shapes. Cirrus clouds are high clouds .They look like feathers .Cumulus clouds are middle clouds. These look like giant cotton balls in the sky .Stratus are low clouds. They cover the sky like bed sheets. Most of the water in clouds is in very small droplets. The droplets are so light they float in air. Sometimes those droplets join with other droplets. Then they turn into larger drops. When that happens, gravity causes them to fall to Earth. We call the falling water drops "rain". When the air is colder the water may form snowflakes instead. Freezing rain, sleet or even hail can fall from clouds.
